Subject Index

anisotropic shell 431
autoparametric resonance 385
averaged Langrangian 145

beam(s) 13, 365
bifurcation to chaos 105
bifurcations 347

cables 465
chaos 183, 225, 385
clearance nonlinearity 183
component mode synthesis 57
composite beams 273
constrained motion 245
correlation dimension 329
coupled lonlinear oscillator 261

Duffing equation 261
dynamic stability 165
dynamics 57

effect of torsional elasticity 41
escape 225
experimental 375
extended model 413
extension-bending-shear vibrations 431
extensional-flexural-flexural-torsional-shearing-shearing vibrations 273

feedback linearization 199
finite element method 57
finite elements 85
fixed point algorithm 105
free vibration 13
friction 245

Galerkin procedure 145
general nonlinear equation of motion 431
geometric imperfections 165
geometric nonlinearity 273, 431
gravity effect 365

Hopf bifurcation 19, 385
hysteresis 305

identification from noisy measurements 1
identification technique 1
impacts 245
internal resonance 19
Itô 305

large rotations 85
laser vibrometer 329
limit cycles 19

mechanical oscillator 183
method
  finite element 57
  of multiple scales 261, 365
  perturbation 123, 225, 347
  quadrature 13
modal interactions 465
modal state observer 329
multibody dynamics 57
multibody systems 85
multiple scales 19

nonlinear 375
  damping 413
  deformations 85
  dynamic systems 1
  model 199
  modes 347
  normal modes 123
  oscillation(s) 13, 41, 225, 365
  resonances 123
  vibration(s) 57, 347

parametric excitation 41
parametric vibrations 165
period-doubling bifurcations 183
perturbation analysis 465
perturbation methods 123, 225, 347
pinching 305

quadrature method 13
quasi-periodic response 105

random vibrations 305
rectangular plates 165
resonance(s) 145
  autoparametric 385

internal 19
nonlinear 123
restoring face surface 413
roller-coaster 375

saturation 465
scaling behavior 261
ship dynamics 41
shock absorber 413
stability 199
stick-slip vibrations 329

third-order shear deformation theory 273, 431
torus 385
triangular elements 57
twin-lift helicopter 199
two-point boundary-value problem 1

unilateral contacts 245

valve 145
vibration(s) 1
extension-bending-shear 431
extensional-flexural-flexural-torsional-shearing-shearing 273
free 13
nonlinear 57, 347
parametric 165
random 305
stick-slip 329
